

Table with columns: Year, Date, BOID ID, State, Water, Boat Manufacturer, Boat Year, Make, Length, OH Manufacturer, Rearrangement, Struck by Prop, Fatality, Impact, Accident Description, Number or Board, Impact Party. The table lists various boat accidents from 2015 to 2018, detailing incidents such as propeller strikes, collisions, and capsizing events across multiple states.

As of 24 August 2018 the list above included approximately 188 incidents, some of which involved multiple propeller strikes.

We included a new data bank as some boat types are quite similar in appearance to portland boats.

Over the bow? accidents we have not yet confirmed as going over the bow. The boat has been missing USCG's verification of the accident, resulting in the state accident report, or finally finding coverage of the accident. We suspect at least 20 of these accidents were over the bow, but we have not yet confirmed them.
